## Summary

When I started GuitarDistrict.com I had my first taste of how what I code can be used by anyone. I used HTML, CSS, Javascript, PHP in addition to working with API's (eBay, PayPal, Amazon, ProStores). It was a startup environment where smart thinking, meeting goals and customer service were a day in the life.

At General Assembly I greatly expanded my knowledge by incorporating Ruby, Rails, jQuery, Git/GitHub (and much more) into my existing stack. It was incredible being in a truly immersive coding program where we were teachers and students, partners and leaders, thinkers and tinkerers.

As a full-stack web developer I am looking for an engineering position where my skillset can be best utilized.

## Technical Skills

Languages/Frameworks	Database	APIs	Other
- Ruby	- MySQL	- Google Maps	- jQuery
- Rails	- PostgreSQL	- Twitter	- Testing (RSpec/Mocha)
- Sinatra		- PayPal	- Aperture
- Javascript	Code Management		- Bootstrap
- PHP	- Git		- Isotope
- HTML5	- Git Hub		... learning more all the time
